GEOPHYSICAL JOURNAL AUTHOR INDEX BY VOLUME 77

AU DANIEL, CLOWES RON M Shear-wave velocity structure of the oceanic lithosphere from ocean bottom seismometer studies..... 105
BARRODALE I, CHAPMAN N R, ZALA C A Estimation of bubble pulse wavelets for deconvolution of marine seismograms..... 331
BASSETT W A, LIU L Reply to comments by Jackson, Ringwood and McCammon with further observations on wustite and magnetite..... 283
BERBERIAN M, JACKSON J A, GHORASHI M, KADJAR M H Field and teleseismic observations of the 1981 Golbaf-Sirch earthquakes in SE Iran..... 809
BHALLA M S, POORNACHANDRA RAO, Poornachandra Rao Lonar Lake: palaeomagnetic evidence for shock origin..... 847
BHALLA M S, KUMAR A Palaeomagnetism of Sukinda chromites and their geological implications..... 863
BOCK G, HA J Short-period S-P conversion in the mantle at a depth near 700 km..... 593
BONHOMMET N, PERROUD H A Devonian palaeomagnetic pole for Armorica..... 839
BRIDEN J C, WATTS D R Palaeomagnetic signature of slow post-orogenic cooling of the north-east Highlands of Scotland recorded in the Newer Gabbros of Aberdeenshire..... 775
BUTLER R P-wave amplitudes in the United States: east-west variations and variability..... 767
McCammon, JACKSON IAN, RINGWOOD A E, MCCAMMON Comment on 'High-pressure polymorphism of FeO? An alternative interpretation and its implications for the Earth's core' by L. Liu, P. Shen and W.A. Bassett..... 279
CAPUTO M Relaxation and free modes of a self-gravitating planet..... 789
CHAPMAN N R, BARRODALE I, ZALA C A Estimation of bubble pulse wavelets for deconvolution of marine seismograms..... 331
CHAVE A D, PARK J On the estimation of magnetotelluric response functions using the singular value decomposition..... 683
CHAVE ALAN D, FILLOUX J H Electromagnetic induction fields in the deep ocean off California: oceanic and ionospheric sources..... 143
CHIN R C Y, HEDSTROM G W, THIGPEN L Matrix methods in synthetic seismograms..... 483
CHRISTENSEN U Convection with pressure- and temperature-dependent non-Newtonian rheology..... 343
CLOWES RON M, AU DANIEL Shear-wave velocity structure of the oceanic lithosphere from ocean bottom seismometer studies..... 105
COLE G H A Comments of the differentiation of icy satellites..... 549
COMER ROBERT P The tsunami mode of a flat earth and its excitation by earthquake sources..... 1
COMER ROBERT P Tsunami generation: a comparison of traditional and normal mode approaches..... 29
CROSSLEY DAVID Comment on 'Upper limit of undertone periods' by G.P.H. Pedersen and B. Bodri..... 415
McKenzie, JACKSON JAMES, MCKENZIE Active tectonics of the Alpine-Himalayan Belt between western Turkey and Pakistan..... 185
DOUGLAS A Teleseismic observations of aftershocks immediately following an underground explosion..... 503
EDWARDS J Partial anhysteric remanent magnetizations produced in rotating samples, and comparisons with corresponding rotational remanent magnetizations..... 619
FILLOUX J H, CHAVE ALAN D Electromagnetic induction fields in the deep ocean off California: oceanic and ionospheric sources..... 143
FRAZIER G A, OLSEN A H, ORCUTT J A The discrete wavenumber/finite element method for synthetic seismograms..... 421
FULLAGAR P K A uniqueness theorem for horizontal loop electromagnetic frequency soundings..... 559
Poornachandra Rao, POORNACHANDRA RAO, BHALLA M S Lonar Lake: palaeomagnetic evidence for shock origin..... 847
GHORASHI M, BERBERIAN M, JACKSON J A, KADJAR M H Field and teleseismic observations of the 1981 Golbaf-Sirch earthquakes in SE Iran..... 809
GIARDINI D Systematic analysis of deep seismicity: 200 centroid-moment tensor solutions for earthquakes between 1977 and 1980..... 883

GRAND S, RIAL J A, HELMBERGER D V A note on lateral variation in upper mantle shear-wave velocity across the Alpine front..... 639
GUBBINS D Geomagnetic field analysis - II. Secular variation consistent with a perfectly conducting core..... 753
HA J, BOCK G Short-period S-P conversion in the mantle at a depth near 700 km..... 593
HAINES A J A phase-front method - II. Broad frequency band SH-waves..... 43
HAINES A J A phase-front method - III. Acoustic waves, P- and S-waves..... 65
HEDSTROM G W, CHIN R C Y, THIGPEN L Matrix methods in synthetic seismograms..... 483
HELLER FREIDRICH, TUNGSHENG LIU Magnetism of Chinese loess deposits..... 125
HELMBERGER D V, RIAL J A, GRAND S A note on lateral variation in upper mantle shear-wave velocity across the Alpine front..... 639
HOWSON C D, SINHA M C A comparison of ultrasonic and synthetic seismograms for a laterally varying structure..... 517
IIJIMA R, KIM J S, SUGIURA M A case-study of the evolution of polar-cap currents and auroral electrojets during polar geomagnetic distrubances with IMS magnetiometer data..... 729
JACKSON IAN, RINGWOOD A E, MCCAMMON, McCammon Comment on 'High-pressure polymorphism of FeO? An alternative interpretation and its implications for the Earth's core' by L. Liu, P. Shen and W.A. Bassett..... 279
JACKSON J A, BERBERIAN M, GHORASHI M, KADJAR M H Field and teleseismic observations of the 1981 Golbaf-Sirch earthquakes in SE Iran..... 809
JACKSON JAMES, MCKENZIE, McKenzie Active tectonics of the Alpine-Himalayan Belt between western Turkey and Pakistan..... 185
JEFFREYS HAROLD, SHIMSHONI M Distant P and PKP..... 271
JOHNSON L R, LEE R C Tau estimates for mantle P- and S-waves from global travel-time observations..... 655
JOHNSON L R, LEE R C External bounds on the seismic velocities in the Earth's mantle..... 667
KADJAR M H, BERBERIAN M, JACKSON J A, GHORASHI M Field and teleseismic observations of the 1981 Golbaf-Sirch earthquakes in SE Iran..... 809
KAYAL J R Microseismicity and tectonics at the Indian/Pacific plate boundary: south-east Wellington province, New Zealand..... 567
KIM J S, IIJIMA R, SUGIURA M A case-study of the evolution of polar-cap currents and auroral electrojets during polar geomagnetic distrubances with IMS magnetiometer data..... 729
KING G, YIELDING G The evolution of a thrust fault system: processes of rupture inititation, propagation and termination in the 1980 El Asnam, Algeria earthquake..... 915
KUMAR A, BHALLA M S Palaeomagnetism of Sukinda chromites and their geological implications..... 863
LAGIOS E, LYNESS D A microgravimetric network in east central Greece - and area of potential seismic hazard..... 875
LAGO B, RABINOWICZ M Admittance for a convection in a layered spherical shell..... 461
LEE R C, JOHNSON L R Tau estimates for mantle P- and S-waves from global travel-time observations..... 655
LEE R C, JOHNSON L R External bounds on the seismic velocities in the Earth's mantle..... 667
LIU L, BASSETT W A Reply to comments by Jackson, Ringwood and McCammon with further observations on wustite and magnetite..... 283
LYNESS D, LAGIOS E A microgravimetric network in east central Greece - and area of potential seismic hazard..... 875
MAJDA GEORGE, PATTON HOWARD J An improved version of an algorithm due to Takeuchi and Saito..... 265
MCCAMMON, JACKSON IAN, RINGWOOD A E, McCammon Comment on 'High-pressure polymorphism of FeO? An alternative interpretation and its implications for the Earth's core' by L. Liu, P. Shen and W.A. Bassett..... 279
MCKENZIE, JACKSON JAMES, McKenzie Active tectonics of the Alpine-Himalayan Belt between western Turkey and Pakistan..... 185
OLSEN A H, ORCUTT J A, FRAZIER G A The discrete wavenumber/finite element method for synthetic seismograms..... 421
ORCUTT J A, OLSEN A H, FRAZIER G A The discrete wavenumber/finite element method for synthetic seismograms..... 421
PARK J, CHAVE A D On the estimation of magnetotelluric response functions using the singular value decomposition..... 683

PATTON HOWARD J, MAJDA GEORGE An improved version of an algorithm due to Takeuchi and Saito..... 265
PERROUD H, BONHOMMET N A Devonian palaeomagnetic pole for Armorica..... 839
POORNACHANDRA RAO, Poornachandra Rao, BHALLA M S Lonar Lake: palaeomagnetic evidence for shock origin..... 847
RABINOWICZ M, LAGO B Admittance for a convection in a layered spherical shell..... 461
RIAL J A, GRAND S, HELMBERGER D V A note on lateral variation in upper mantle shear-wave velocity across the Alpine front..... 639
RINGWOOD A E, JACKSON IAN, MCCAMMON, McCammon Comment on 'High-pressure polymorphism of FeO? An alternative interpretation and its implications for the Earth's core' by L. Liu, P. Shen and W.A. Bassett..... 279
SHIMSHONI M, JEFFREYS HAROLD Distant P and PKP..... 271
SINHA M C, HOWSON C D A comparison of ultrasonic and synthetic seismograms for a laterally varying structure..... 517
STEPHENSON RANDELL Flexural models of continental lithosphere based on the long-term erosional decay of topography..... 385
SUGIURA M, IIJIMA R, KIM J S A case-study of the evolution of polar-cap currents and auroral electrojets during polar geomagnetic distrubances with IMS magnetiometer data..... 729
TANIMOTO TOSHIRO A simple derivation of the formula to calculate synthetic long-period seismograms in a heterogeneous earth by normal mode summation..... 275
THIGPEN L, CHIN R C Y, HEDSTROM G W Matrix methods in synthetic seismograms..... 483
TREHU A M Lateral velocity variations in the Orozco Transform Fault inferred from observed incident angles and azimuths of P-waves..... 711
TUNGSHENG LIU, HELLER FREIDRICH Magnetism of Chinese loess deposits..... 125
VANYO J P Earth core motions: experiments with spheroids..... 173
WATTS D R, BRIDEN J C Palaeomagnetic signature of slow post-orogenic cooling of the north-east Highlands of Scotland recorded in the Newer Gabbros of Aberdeenshire..... 775
YIELDING G, KING G The evolution of a thrust fault system: processes of rupture inititation, propagation and termination in the 1980 El Asnam, Algeria earthquake..... 915
YOUNG R M Formal power series and iterative methods for wave vectors..... 531
ZALA C A, BARRODALE I, CHAPMAN N R Estimation of bubble pulse wavelets for deconvolution of marine seismograms..... 331

BOOK REVIEWS
BOOK REVIEWS..... 935

EARTH'S CORE
Earth core motions: experiments with spheroids, VANYO J P..... 173
Comment on 'High-pressure polymorphism of FeO? An alternative interpretation and its implications for the Earth's core' by L. Liu, P. Shen and W.A. Bassett, JACKSON IAN, RINGWOOD A E, MCCAMMON, McCammon..... 279
Reply to comments by Jackson, Ringwood and McCammon with further observations on wustite and magnetite, LIU L, BASSETT W A..... 283
Geomagnetic field analysis - II. Secular variation consistent with a perfectly conducting core, GUBBINS D..... 753

EARTH'S LITHOSPHERE
Convection with pressure- and temperature-dependent non-Newtonian rheology CHRISTENSEN U..... 343
Flexural models of continental lithosphere based on the long-term erosional decay of topography, STEPHENSON RANDELL..... 385
Admittance for a convection in a layered spherical shell, LAGO B, RABINOWICZ M..... 461

EARTH'S MANTLE
Short-period S-P conversion in the mantle at a depth near 700 km, BOCK G, HA J..... 593
A note on lateral variation in upper mantle shear-wave velocity across the Alpine front, RIAL J A, GRAND S, HELMBERGER D V..... 639
External bounds on the seismic velocities in the Earth's mantle, LEE R C, JOHNSON L R..... 667

ELASTIC WAVE THEORY
The tsunami mode of a flat earth and its excitation by earthquake sources, COMER ROBERT P..... 1
Tsunami generation: a comparison of traditional and normal mode approaches COMER ROBERT P..... 29
A phase-front method - II. Broad frequency band SH-waves, HAINES A J..... 43
A phase-front method - III. Acoustic waves, P- and S-waves, HAINES A J.... 65
An improved version of an algorithm due to Takeuchi and Saito, MAJDA GEORGE, PATTON HOWARD J..... 265
A simple derivation of the formula to calculate synthetic long-period seismograms in a heterogeneous earth by normal mode summation, TANIMOTO TOSHIRO..... 275
The discrete wavenumber/finite element method for synthetic seismograms, OLSEN A H, ORCUTT J A, FRAZIER G A..... 421
Matrix methods in synthetic seismograms, CHIN R C Y, HEDSTROM G W, THIGPEN L..... 483
A comparison of ultrasonic and synthetic seismograms for a laterally varying structure, HOWSON C D, SINHA M C..... 517
Short-period S-P conversion in the mantle at a depth near 700 km, BOCK G, HA J..... 593

ELECTRICAL METHODS AND SURVEYS
A uniqueness theorem for horizontal loop electromagnetic frequency soundings, FULLAGAR P K..... 559

ELECTROMAGNETIC INDUCTION
Electromagnetic induction fields in the deep ocean off California: oceanic and ionospheric sources, CHAVE ALAN D, FILLOUX J H..... 143
A uniqueness theorem for horizontal loop electromagnetic frequency soundings, FULLAGAR P K..... 559

EXPLOSION PHENOMENA

Teleseismic observations of aftershocks immediately following an underground explosion, DOUGLAS A..... 503

FREE OSCILLATIONS OF EARTH
Comment on 'Upper limit of undertone periods' by G.P.H. Pedersen and B. Bodri, CROSSLEY DAVID..... 415
Relaxation and free modes of a self-gravitating planet, CAPUTO M..... 789

GRAVITY METHODS AND SURVEYS
A microgravimetric network in east central Greece - and area of potential seismic hazard, LYNESS D, LAGIOS E..... 875

HYDRODYNAMICS
Convection with pressure- and temperature-dependent non-Newtonian rheology CHRISTENSEN U..... 343
Admittance for a convection in a layered spherical shell, LAGO B, RABINOWICZ M..... 461

INVERSE PROBLEMS AND METHODS OF INFERENCE
Formal power series and iterative methods for wave vectors, YOUNG R M..... 531

IONOSPHERE
A case-study of the evolution of polar-cap currents and auroral electrojets during polar geomagnetic distrubances with IMS magnetiometer data, IIJIMA R, KIM J S, SUGIURA M..... 729

MAGNETIC FIELD OF EARTH
Geomagnetic field analysis - II. Secular variation consistent with a perfectly conducting core, GUBBINS D..... 753

MAGNETIC PROPERTIES
Partial anhysteric remanent magnetizations produced in rotating samples, and comparisons with corresponding rotational remanent magnetizations, EDWARDS J..... 619

MAGNETOSPHERE
A case-study of the evolution of polar-cap currents and auroral electrojets during polar geomagnetic distrubances with IMS magnetiometer data, IIJIMA R, KIM J S, SUGIURA M..... 729

MAGNETOTELLURIC METHODS AND SURVEYS
On the estimation of magnetotelluric response functions using the singular value decomposition, PARK J, CHAVE A D..... 683

MARINE GEOPHYSICS
Estimation of bubble pulse wavelets for deconvolution of marine seismograms, BARRODALE I, CHAPMAN N R, ZALA C A..... 331

METEOROLOGY
Shear-wave velocity structure of the oceanic lithosphere from ocean bottom seismometer studies, AU DANIEL, CLOWES RON M..... 105

PALAEOMAGNETISM
Magnetism of Chinese loess deposits, HELLER FREIDRICH, TUNGSHENG LIU..... 125
Palaeomagnetic signature of slow post-orogenic cooling of the north-east Highlands of Scotland recorded in the Newer Gabbros of Aberdeenshire, WATTS D R, BRIDEN J C..... 775
A Devonian palaeomagnetic pole for Armorica, PERROUD H, BONHOMMET N..... 839
Lonar Lake: palaeomagnetic evidence for shock origin, POORNACHANDRA RAO, Poornachandra Rao, BHALLA M S..... 847
Palaeomagnetism of Sukinda chromites and their geological implications, KUMAR A, BHALLA M S..... 863

PHYSICS OF ROCKS
Comment on 'High-pressure polymorphism of FeO? An alternative interpretation and its implications for the Earth's core' by L. Liu, P. Shen and W.A. Bassett, JACKSON IAN, RINGWOOD A E, MCCAMMON, McCammon..... 279

Reply to comments by Jackson, Ringwood and McCammon with further observations on wustite and magnetite, LIU L, BASSETT W A..... 283

PLANETARY DYNAMICS
Relaxation and free modes of a self-gravitating planet, CAPUTO M..... 789

PLANETARY PHYSICS
Comments of the differentiation of icy satellites, COLE G H A..... 549

SEISMIC METHODS AND SURVEYS
Estimation of bubble pulse wavelets for deconvolution of marine seismograms, BARRODALE I, CHAPMAN N R, ZALA C A..... 331
Matrix methods in synthetic seismograms, CHIN R C Y, HEDSTROM G W, THIGPEN L..... 483
Teleseismic observations of aftershocks immediately following an underground explosion, DOUGLAS A..... 503
A comparison of ultrasonic and synthetic seismograms for a laterally varying structure, HOWSON C D, SINHA M C..... 517

SEISMICITY
Microseismicity and tectonics at the Indian/Pacific plate boundary: south-east Wellington province, New Zealand, KAYAL J R..... 567
A microgravimetric network in east central Greece - and area of potential seismic hazard, LYNESS D, LAGIOS E..... 875
Systematic analysis of deep seismicity: 200 centroid-moment tensor solutions for earthquakes between 1977 and 1980, GIARDINI D..... 883

SEISMOLOGY
Shear-wave velocity structure of the oceanic lithosphere from ocean bottom seismometer studies, AU DANIEL, CLOWES RON M..... 105
Distant P and PKP, JEFFREYS HAROLD, SHIMSHONI M..... 271
Short-period S-P conversion in the mantle at a depth near 700 km, BOCK G, HA J..... 593
A note on lateral variation in upper mantle shear-wave velocity across the Alpine front, RIAL J A, GRAND S, HELMBERGER D V..... 639
Tau estimates for mantle P- and S-waves from global travel-time observations, LEE R C, JOHNSON L R..... 655

SEISMOLOGY BODILY WAVES
A phase-front method - II. Broad frequency band SH-waves, HAINES A J..... 43
A phase-front method - III. Acoustic waves, P- and S-waves, HAINES A J.... 65
Distant P and PKP, JEFFREYS HAROLD, SHIMSHONI M..... 271
A note on lateral variation in upper mantle shear-wave velocity across the Alpine front, RIAL J A, GRAND S, HELMBERGER D V..... 639
Tau estimates for mantle P- and S-waves from global travel-time observations, LEE R C, JOHNSON L R..... 655
External bounds on the seismic velocities in the Earth's mantle, LEE R C, JOHNSON L R..... 667
Lateral velocity variations in the Orozco Transform Fault inferred from observed incident angles and azimuths of P-waves, TREHU A M..... 711
P-wave amplitudes in the United States: east-west variations and variability, BUTLER R..... 767
Field and teleseismic observations of the 1981 Golbaf-Sirch earthquakes in SE Iran, BERBERIAN M, JACKSON J A, GHORASHI M, KADJAR M H..... 809

TECTONICS
Active tectonics of the Alpine-Himalayan Belt between western Turkey and Pakistan, JACKSON JAMES, MCKENZIE, McKenzie..... 185
Microseismicity and tectonics at the Indian/Pacific plate boundary: south-east Wellington province, New Zealand, KAYAL J R..... 567
Lateral velocity variations in the Orozco Transform Fault inferred from observed incident angles and azimuths of P-waves, TREHU A M..... 711
Field and teleseismic observations of the 1981 Golbaf-Sirch earthquakes in SE Iran, BERBERIAN M, JACKSON J A, GHORASHI M, KADJAR M H..... 809
Lonar Lake: palaeomagnetic evidence for shock origin, POORNACHANDRA RAO, Poornachandra Rao, BHALLA M S..... 847
The evolution of a thrust fault system: processes of rupture initiation, propagation and termination in the 1980 El Asnam, Algeria earthquake, KING G, YIELDING G..... 915

TSUNAMIS
The tsunami mode of a flat earth and its excitation by earthquake sources, COMER ROBERT P..... 1
Tsunami generation: a comparison of traditional and normal mode approaches COMER ROBERT P..... 29

UKGA ABSTRACTS
UK Geophysical Assembly Supplement - VIII..... 330

Geophysical Journal of the Royal Astronomical Society

The subscription cost of the *Journal* in 1984 is as follows:

to Libraries and Institutions	in the UK	£230.00
	outside the UK	£265.00 (US $505.00*)
to individuals resident outside the United Kingdom who certify that the *Journal* is for their personal use only		£44.00 (US $84.00*)
to Fellows of the Geological Society of London		£27.50
to Fellows of the Royal Astronomical Society		£22.00
to Junior Members of the Society		£8.00

The prices of back numbers of the *Journal* are (per volume):

Vols 1–47 (1958–December 1976), obtainable from the Royal Astronomical Society	£24.00
Vols 48–59, obtainable from Blackwell Scientific Publications Ltd	£35.50
Vols 60–63	£43.75
Vols 64–67	£53.75
Vols 68–71	£55.00
Vols 72–75	£58.75

*This price applies to the USA and Canada and includes the cost of accelerated surface post.

Membership of the Royal Astronomical Society

The annual contributions payable by members of the Royal Astronomical Society in 1984 are:

By Fellows aged 30 years and over	£30.00
Fellows under 30 years old	£20.00
Junior Members	£10.00

at 1984 January 1
